

Terramycin[®] 200 Granular

A convenient granular formulation

You've used *Terramycin* (oxytetracycline) anti-infective for swine as a proven-effective product against a wide range of infectious diseases for years.

*Terramycin 200 Granular*¹ – Right for today's production needs.

Key benefit of granular formulations²

- Improved flowability
- Reduced dust
- Uniform dispersion

Potency

- Highest potency feed-grade granular tetracycline available
- Each 50 lb. bag of *Terramycin 200 Granular* medicates twice as many pigs as the leading competitor's anti-infective
- Creates more space in nutrient-dense diets

Broad Spectrum Treatment

- Treats bacterial pneumonia and bacterial enteritis
- Effective treatment and control of leptospirosis
- Can be used in combination with *Mecadox*[®] antimicrobial for better pig performance and protection against both respiratory and enteric disease

Zero-Day Withdrawal

- Safe to use
- Used in all stages of animal production
- No withdrawal required in swine — Can be fed right up to market weight

Economical & Convenient

- Lower cost-per-gram of activity
- Fewer bags to handle
- Reduced storage requirements
- Reduced freight costs

Refer to product label for warnings and indications. Use only as directed.

Although no withdrawal is required, we recommend you follow the NPPC voluntary 14-day withdrawal period for all products containing tetracyclines.

The label contains complete use information, including cautions and warnings. Always read and follow the label and use instructions.
